

**“Culture collection and microbial systematics session in IUMS 2011”
(JSCC and WFCC Joint Symposium)**

September 7, 2011 16:30 – 18:30

Sapporo Convention Center Room C

Organizer: Ken-ichiro Suzuki and Philippe Desmeth

Chairpersons: Takashi Itoh and Philippe Desmeth

1. 16:30 -16:55

Species concept in the yeast taxonomy

Marc Andre Lachance (University of Western Ontario, Canada)

lachance@uwo.ca

2. 16:55 – 17:20

Use of MALDI-TOF MS as a phenotypic alternative to assess microbial species classification

Ramon Rossello-Mora (Grup de Microbiologia Marina, Institut Mediterrani d'Estudis Avanc, Spain)

ramon@imedea.uib-csic.es

3. 17:20 – 17:45

Is species an essential unit of microbial systematics?

Peter Kämpfer (Justus-Liebig-University Giessen, Germany)

peter.kaempfer@agrار.uni-giessen.de

4. 17:45 – 18:10

The roles of culture collections in microbial systematics

Takashi Itoh (JCM, RIKEN BioResource Center, Japan)

ito@jcm.riken.jp

5. 18:10 – 18:30

Quality of culture collections and the global network

Philippe Desmeth (Belgian Co-ordinated Collections of Micro-organisms, Belgium)

philippe.desmeth@belspo.be
